Dear Sir:

Professor Peter Otto Hess clearly deserves to be awarded the Profesor emérito from Universidad Nacional Autónoma de México. I have known Professor Hess and followed his career since he was a student at the University of Frankfurt. He is an excellent theoretical physicist. He has a distinguished record of 196 peer reviewed scientific publications and another 60 publications in International and National conference proceedings as well as seven Popular Science publications. He has directed 11 Ph.D., 11 Masters and 11 bachelor theses during his career.

He has taught many different courses at the University and universities abroad. He has been awarded Guest Professorships at the University of Frankfurt (on several occasions), University of Cape Town, University Justus-Liebig, Giessen (more than once). He has organized 30 international symposium that have been highly regarded. He has continuously collaborated in research with distinguished professors like Professor Walter Greiner, Frankfurt; J. A. Draayer, Louisiana State University; J. A. Maruhn, Frankfurt; W. Scheid, Giessen; A. Sandulescu, Romania; S. Misicu, Romania; P.-G. Reinhard, University of Erlangen; R. V. Jolos, Gissen; A. Brown, Michigan State University to further emphasize the high regard with which his research is held.

His many other accomplishments are documented in his curriculum vita. It is with the greatest pleasure that I recommend he be given the Profesor emérito from Universidad Nacional Autónoma de México

Sincerely yours,

Joseph H. Hamilton, Ph.D., Dr. h.c. multi
Landon C. Garland Distinguished
Professor of Physics
